ABOUT IIT ROPAR

Indian Institute of Technology, Ropar (IIT Ropar) is one of the new IITs (established in 2008) set up by the Ministry of Human Resource Development (MHRD), Government of Bharat. The Government of Punjab has allotted 501 acres of land on the banks of the river Sutlej to IIT Ropar. The foundation stone of the Institute was laid on February 24, 2009. The Institute enables students to gain exposure to recent trends in their chosen domains of study and practical experience through a wide variety of activities that the institute facilitates in its own campus and arranges for in collaboration with industry and other institutes. This campus is a self-contained township catering to all the needs of faculty, staff and students. Arrangements have been made for classes, laboratories, hostels and faculty accommodation.

ABOUT DEPARTMENT OF HOLISTIC EDUCATION

The Department of Holistic Education is the brainchild of Dr. Thakur SKR who is a distinguished scientist of ISRO, a dedicated social worker and an accomplished author. The foundation of DHE is based on the ideology that the level of education should not be gauged by academic scores alone. At present, DHE has 25 dedicated cells catering to various aspects of education system with dedicated co-ordinators to lead these cells. Since inception, the Department has multiple revolutionary projects- E-cycle, Punjab Super 100, Tredul App, Sarvatr App, Swadeshi Bazaar App, TUDU App, Jobs360o App, Holistic Harbor App, Surbhi Diye, Surbhi Piggy Bag, Surbhi Flower Pot, etc. to its credit. The department has successfully organised mass outreach events viz Shiksha Mahakumbh at NIT Jalandhar and Shiksha Kumbh at NIT Kurukshetra in the year 2023 which were attended by dignitaries and stakeholders from all fields – viz politics, bureaucracy, educational stalwarts, corporate houses, media and speakers from all domains. DHE has also launched its quarterly journal “Viksit India” which offers comprehensive coverage of a multitude of educational aspects.

CONFERENCE OBJECTIVE

The conference invites contributions in a diverse array of areas crucial to the transformation of the World Education System. From global perspective integration and innovative pedagogical approaches to technological advancements, the conference aims to delve into critical themes such as inclusivity, quality assurance, teacher training, and policy advocacy. The discussions will also explore the role of education in addressing sustainable development goals, promoting cultural exchange, and mitigating the digital divide. The conference envisions a comprehensive approach, advocating for multidisciplinary learning, ethical and sustainable education practices, and flexible learning pathways. It seeks to facilitate meaningful dialogue between academicians, researchers, and industrialists, with the ultimate goal of formulating a post-conference action plan for tangible impact on World Education Landscape.

CONFERENCE VENUE AND LOCATION

IIT Ropar is located at Rupnagar (formerly known as Ropar) town of the district Rupnagar. Rupnagar was founded in the 11th century and named after Rup Sen, son of Raja Rakeshar. Recent excavations and explorations conducted at Rupnagar indicate that the first settlements here were the Harappans, who reached the upper Satluj towards the close of third millennium B.C. The district has rich historical and religious significance.

Rupnagar town is the headquarters of district Rupnagar and is located 42 km. from Chandigarh, the state capital. It is connected by a road on National Highway NH-21. The Delhi-Ambala-Una railway line passes through Rupnagar and provides rail connectivity. The nearest airport is at Chandigarh at a distance of about 60 km. The Satluj river passes close to Rupnagar.

The climate is characterised by its general dryness, except during the south-west monsoon season, a hot summer and a cold winter. The winter is from mid-November to February, summer from March to June and the monsoon from late June to mid-September. The average annual rainfall in the district is about 776 mm with about 78% in the period of June to September.
